Employment conditions

It is a requirement when attending any of the Safeworking competencies where an infield assessment forms part of the assessment criteria that the participants have current employment with an organisation that is authorised to interface with Metro Trains rail network.

This enables participants to ensure they have the support to complete the necessary shifts required to complete the infield assessment component. It is therefore required that when enrolling in a Safeworking training competency, the participant must either;

1. Be enrolled by the appropriate representative of the Safeworking company directly; or
2. Provide a letter on company letterhead, signed by the appropriate representative of that company stating that they will support the participant by providing the necessary shifts to complete the infield logbook

Who can I direct my enquiries to and book for training?
